PROFESSIONAL SUMMARY

Junior Software Developer with three years of software engineering studies and hands-on experience building desktop and web applications across Java/JavaFX, PHP/Symfony, and C++/Qt stacks. Skilled in object-oriented programming, relational databases, and MVC architecture, with practical experience applying Scrum and Agile methodologies within multi-developer teams. Comfortable integrating AI components (Google Gemini API, local TF-IDF/LLM models) and hardware peripherals (Arduino sensors) into full-stack applications. Daily Arch Linux user with strong interest in backend development and reliable system design.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, PHP, Python, SQL, HTML, CSS, JavaScript, Bash

Frameworks & Libraries: Symfony 6.4, JavaFX, FXML, Qt / Qt Creator, Doctrine ORM, JDBC, Twig, MVC Architecture, OOP

Databases: MySQL, Oracle Database, PL/SQL, Relational Database Design

AI & Media: Google Gemini API, TF-IDF cosine similarity, Jaccard similarity, local LLM integration (Python), GStreamer, PipeWire

Methodologies: Scrum, Agile, SOLID Principles, Clean Code, Unit Testing (PHPUnit), Static Analysis (PHPStan Level 9)

Hardware / IoT: Arduino (fingerprint sensor, occupancy sensor, smoke detector)

Tools: Linux (Arch Linux), Git, GitHub, Maven, Composer, Networking Fundamentals

CERTIFICATIONS

- Complete Guide to Git — LinkedIn Learning, June 2026 (7h 38m; Version Control, Git)

EDUCATION

Software Engineering — Coursework, discontinued — ESPRIT — School of Engineering 2023 – 2026

- Coursework in Object-Oriented Programming, Algorithms, Data Structures, Software Design, Web Development, Database Systems, C++, and Java. Studies discontinued in 2026; no degree conferred.

Electrical Engineering — Coursework — ISET Nabeul 2022 – 2023

- Coursework in electronics, hardware systems, digital systems, and engineering fundamentals. No diploma awarded.

Technical Baccalaureate — 2022

ACADEMIC PROJECTS

Talentia — HR Management Platform (Desktop) | Java 17 · JavaFX · FXML · MySQL · JDBC · MVC

Integrated project, Esprit School of Engineering — team of 6 engineers, academic year 2025–2026.

- Owned the “Entretiens & Evaluations” module: interview scheduling, evaluation forms and scoring, performance-tracking dashboard, and automated reminders.
- Designed and built a custom real-time meeting platform for remote interviews using GStreamer and PipeWire for audio/video streaming.
- Collaborated within a 6-person team following Scrum/Agile practices across sprints, standups, and shared MySQL-backed architecture.

Talentia — HR Management Platform (Web) | Symfony 6.4 · PHP 8.2 · Doctrine ORM · MySQL · PHPUnit · PHPStan

Web counterpart of the Talentia platform, synchronized with the desktop app via a shared MySQL database.

- Delivered the web version of the Entretiens & Evaluations module using Symfony MVC, Doctrine ORM, and Twig templating.
- Built a custom Python service embedding a lightweight local LLM to stand in for an interviewer when unavailable, generating and asking candidates relevant interview questions live during video meetings.

- Applied Agile/Scrum methodology throughout the sprint cycle in coordination with a 6-engineer team.
- Contributed to a codebase validated with PHPUnit test suites and PHPStan Level 9 static analysis.

Smart Consulting Office | C++ · Qt · Qt Creator · SQL · Arduino

Desktop application for managing a smart consulting office, integrated with physical IoT hardware.

- Built the desktop management application with Qt/Qt Creator and a SQL backend, implementing CRUD operations, authentication, and user management.
- Integrated Arduino-based hardware: a fingerprint sensor for door access control, an occupancy sensor to detect whether the office was in use, and a smoke detector for safety monitoring.

PROFESSIONAL EXPERIENCE

IT Support Intern — Commissariat Général au Développement Régional (CGDR)

August 2024

- Installed and configured computer systems; performed hardware and software troubleshooting.
- Assisted with maintenance and local network support, resolving technical issues for end users.
