

AZIZ REBHI

Software Developer | Backend • Systems • Desktop Applications

Email: azizrebhi.tech@gmail.com

Phone: +216 20117739

GitHub: github.com/azizrebhi

PROFESSIONAL SUMMARY

Software engineering student specialized in backend development, desktop applications, systems programming, Linux environments and AI-powered solutions. Experienced with Java, C++, PHP/Symfony, SQL databases, Qt, JavaFX and automation. Interested in building reliable software combining architecture, AI, embedded systems and low-level technologies.

TECHNICAL SKILLS

Languages: Java, C++, PHP, Python, SQL, Bash

Frameworks: Symfony 6.4, JavaFX, Qt

Desktop: JavaFX, FXML, QML, MVC architecture

Databases: MySQL, JDBC, Doctrine ORM

Tools: Git, Maven, Composer, Linux/Arch Linux

AI: Gemini API, TF-IDF, Jaccard similarity, local LLM integration

Methods: Agile, Scrum

EDUCATION

Software Engineering — ESPRIT School of Engineering (2023–Present)

Electrical Engineering — ISET Nabeul (2022–2023)

PROJECTS

Talentia — HR Management Platform

Symfony 6.4 + JavaFX + MySQL platform developed using MVC architecture.

Implemented recruitment, authentication, evaluations, training, leave management and freelancer modules.

Created an AI interview assistant using a custom Python mini LLM model to simulate interviewer questions and assist during interviews.

Implemented AI recruitment features:

- CV matching
- Candidate ranking
- TF-IDF and Jaccard similarity

Talentia JavaFX Desktop Application

Java 17 desktop application using JavaFX, FXML and JDBC.

Developed a custom meeting platform using GStreamer and PipeWire.

Implemented authentication, PDF generation, notifications and AI features.

Quickshell Dynamic Island Desktop Environment

Linux desktop shell project built with Quickshell, QML and Hyprland.

Features:

- Animated Dynamic Island style top panel
- PipeWire audio integration
- MPRIS media control
- Cava visualizer
- WiFi/Bluetooth management
- Notification system
- App launcher
- Wallpaper manager
- Material You theming with Matugen
- Performance mode management

Smart Consulting Office — C++ / Qt

Desktop consulting office management application.

Integrated Arduino hardware:

- Fingerprint door access system
- Office occupancy monitoring with camera capture
- Smoke detection monitoring

EXPERIENCE

IT Support & Network Intern — General Commissariat for Regional Development (CGDR)
01/08/2024 – 30/08/2024

System installation, network configuration, hardware troubleshooting and maintenance.

CERTIFICATION

LinkedIn Learning — Complete Guide to Git
Completed June 30, 2026

Skills: Git, Version Control

DEVELOPMENT PRACTICES

Agile/Scrum workflows, Git collaboration, clean architecture, testing, modular design, Linux system integration and maintainable software development.
